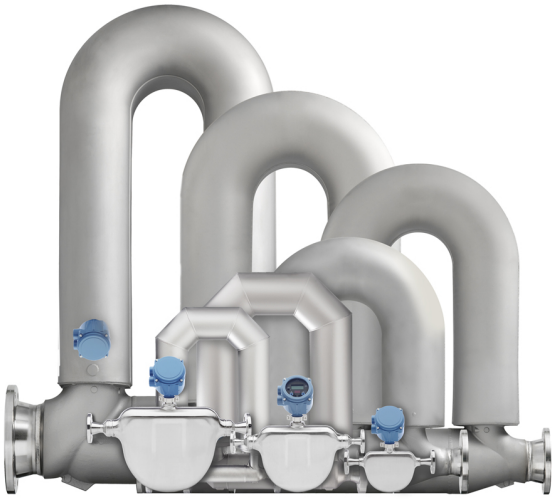
Micro Motion® ELITE® Coriolis Flow and Density Meters

Ultimate real world performance

- Unchallengeable ELITE performance on liquid mass flow, volume flow, and density measurements
- Best-in-class gas mass flow measurement
- Reliable two-phase flow measurement for the most challenging applications
- Designed to minimize process, mounting, and environmental effects



Best fit-for-application

- Scalable platform for the widest range of line size and application coverage including hygienic, cryogenic, high pressure, and high temperature
- Available with the broadest range of I/O offerings highlighted by expansive digital protocol support

Superior measurement confidence

- Smart Meter Verification delivers complete, on-line verification of device health and performance, continuously or on-demand at the press of a button
- Globally leading ISO/IEC 17025 calibration facilities offers best in class uncertainty of ±0.014%
- Intelligent sensor design mitigates the need for zero calibration in the field

ELITE	F-Series	H-Series	T-Series	R-Series	LF-Series
Peak performance	Exceptional performance compact drainable	Hygienic compact drainable	Straight tube sanitary	General purpose flow and density	Extreme low flow

Micro Motion®

EMERSON™
Process Management

Micro Motion® ELITE® series Coriolis flow and density meters

Micro Motion ELITE meters provide unmatched flow and density measurement performance to deliver the ultimate control and confidence in your most complex and challenging liquid, gas, and slurry applications.

Achieving the ultimate flow fit for your application

- Able to achieve the best fit for your flow measurement with a wide range of tube designs and flow rate coverage to best serve your application
- Peak performance in a drainable design with a variety of industry approvals for use in strictly governed sanitary applications
- Scalable platform for a broad array of application coverage including hygienic, cryogenic, and high pressure

Industry-leading capabilities that unleash your process potential

- Available with the most extensive offering of transmitter and mounting options for maximum compatibility with your system
- State of the art, ISO-IEC 17025 compliant calibration stands achieving ±0.014% uncertainty drive best in class measurement accuracy
- The most robust communication protocol offering in the industry including Smart Wireless
- True multi-variable technology measures necessary flow and density process variables simultaneously
- Case pressure ratings derived from ASME B31.3 and NAMUR NE132 international standards

Smart Meter Verification: advanced diagnostics for your entire system

- A comprehensive test that can be run locally or from the control room to provide confidence in your meter functionality and performance
- Verifies that your meter performs as well as the day it was installed, giving you assurance in less than 90 seconds
- Save significant expenditure by reducing labor and outsourced calibration service costs while eliminating process interruption

Unparalleled performance in two-phase flow conditions

- Featuring the lowest frequency Coriolis sensors that ensure the two-phase mixture vibrates with the tube to drastically reduce entrained gas uncertainty contributions
- Unmatched MVD transmitter technology with digital signal processing (DSP) delivers the fastest response and refresh rates enabling accurate batch and other two-phase flow measurement
- Measure fluids with any Gas Void Fraction (GVF). The relationship to mass flow accuracy varies with application

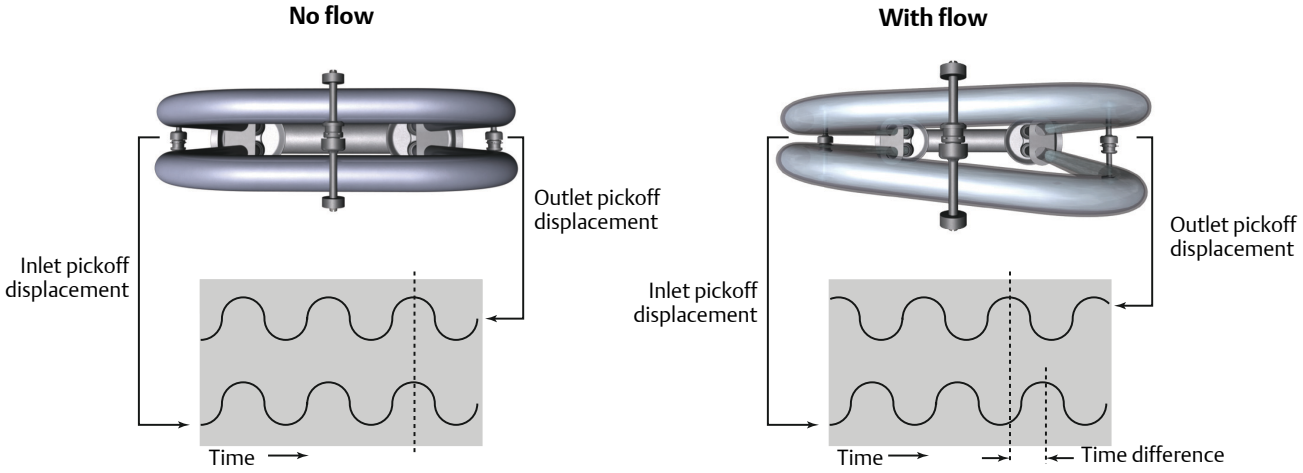
Contents

Measurement principles

As a practical application of the Coriolis effect, the Coriolis mass flow meter operating principle involves inducing a vibration of the flow tube through which the fluid passes. The vibration, though it is not completely circular, provides the rotating reference frame which gives rise to the Coriolis effect. While specific methods vary according to the design of the flow meter, sensors monitor and analyze changes in frequency, phase shift, and amplitude of the vibrating flow tubes. The changes observed represent the mass flow rate and density of the fluid.

Mass flow measurement

The measuring tubes are forced to oscillate producing a sine wave. At zero flow, the two tubes vibrate in phase with each other. When flow is introduced, the Coriolis forces cause the tubes to twist resulting in a phase shift. The time difference between the waves is measured and is directly proportional to the mass flow rate.



Density measurement

The measuring tubes are vibrated at their natural frequency. A change in the mass of the fluid contained inside the tubes causes a corresponding change to the tube natural frequency. The frequency change of the tube is used to calculate density.

Temperature measurement

Temperature is a measured variable that is available as an output. The temperature is also used internal to the sensor to compensate for temperature influences on Young's Modulus of Elasticity.

Meter characteristics

- Measurement accuracy is a function of fluid mass flow rate independent of operating temperature, pressure, or composition. However, pressure drop through the sensor is dependent upon operating temperature, pressure, and fluid composition.
- Specifications and capabilities vary by model and certain models may have fewer available options. Please refer to the Online Store Sizing and Selection Tool at the Micro Motion web site (*www.micromotion.com/onlinestore*) for detailed information regarding performance and capabilities.
- All meters with the CMF designation (CMF, CMFHC, CMFS) are members of the ELITE meter family and should be considered to possess the same qualities and specifications as other ELITE family meters unless specifically noted.
- The letter at the end of the base model code (for example, CMF100M) represents wetted part material and/or application designation: M = 316L stainless steel, L = 304L stainless steel, H = nickel alloy C22, P = high pressure, A = high temperature 316L stainless steel, B = high temperature nickel alloy C22, Y = Super Duplex (UNS S32750). Detailed information about the complete product model codes begins on page 25.

Performance specifications

Reference operating conditions

For determining the performance capabilities of our meters, the following conditions were observed/utilized:

- Water at 68 to 77 °F and 14.5 to 29 psig (20 to 25 °C and 1 to 2 barg)
- Accuracy based on industry leading accredited calibration stands according to ISO 17025
- All models have a density range up to 5 g/cm^3 (5000 kg/m^3)

Accuracy and repeatability on liquids and slurries

Performance Specification	Standard	Optional[1]
Mass/volume flow accuracy[2][3]	±0.10% of rate	±0.05% of rate
Mass/volume flow repeatability	±0.05% of rate	±0.025% of rate
Density accuracy[4][5]	±0.0005 g/cm^3 (±0.5 kg/m^3)	±0.0002 g/cm^3 (±0.2 kg/m^3)
Density repeatability	±0.0002 g/cm^3 (±0.2 kg/m^3)	±0.0001 g/cm^3 (±0.1 kg/m^3)
Temperature accuracy	±1 °C ±0.5% of reading	
Temperature repeatability	±0.2 °C	

(1) Optional accuracy is not available for high temperature models (base model code A/B) or high capacity models (CMFHC2/3/4)
(2) Stated flow accuracy includes the combined effects of repeatability, linearity, hysteresis, and orientation.
(3) For cryogenic applications, liquid accuracy is ±0.35% of rate.
(4) The standard density accuracy option for the sensor models CMFS010, CMFS015 is ±0.002 g/cm^3 (±2 kg/m^3), optional accuracy is ±0.0005 g/cm^3 (±0.5 kg/m^3).
(5) The standard density accuracy option for the sensor model CMFS007 is ±0.002 g/cm^3 (±2 kg/m^3).

Accuracy and repeatability on gases

Performance specification	CMF models	CMFS models
Mass flow accuracy	±0.35% of rate	±0.25% of rate
Mass flow repeatability	±0.20% of rate	
Temperature accuracy	±1 °C ±0.5% of reading	
Temperature repeatability	±0.2 °C	

Liquid flow rates

Nominal flow rate

Micro Motion has adopted the term nominal flow rate, which is the flow rate at which water at reference conditions causes approximately 14.5 psig (1 barg) of pressure drop across the meter.

Mass flow rates for stainless steel models: 304L (L), 316L (M/A), and Super Duplex (Y)

Gas flow rates

When selecting sensors for gas applications, pressure drop through the sensor is dependent upon operating temperature, pressure, and fluid composition. Therefore, when selecting a sensor for any particular gas application, it is highly recommended that each sensor be sized using the Online Store Sizing and Selection Tool at the Micro Motion web site (*www.micromotion.com/onlinestore*).

The below table indicates flow rates that produce approximately 25psig (1.7bar) pressure drop on natural gas.

Gas flow rates for all models

	Mass		Volume	
Model	**lb/min**	**kg/h**	**SCFM**	**Nm^3/h**
CMFS007	0.5	15	12	20

CMFHC4	24,555	668,664	553,360	940,294

Notes

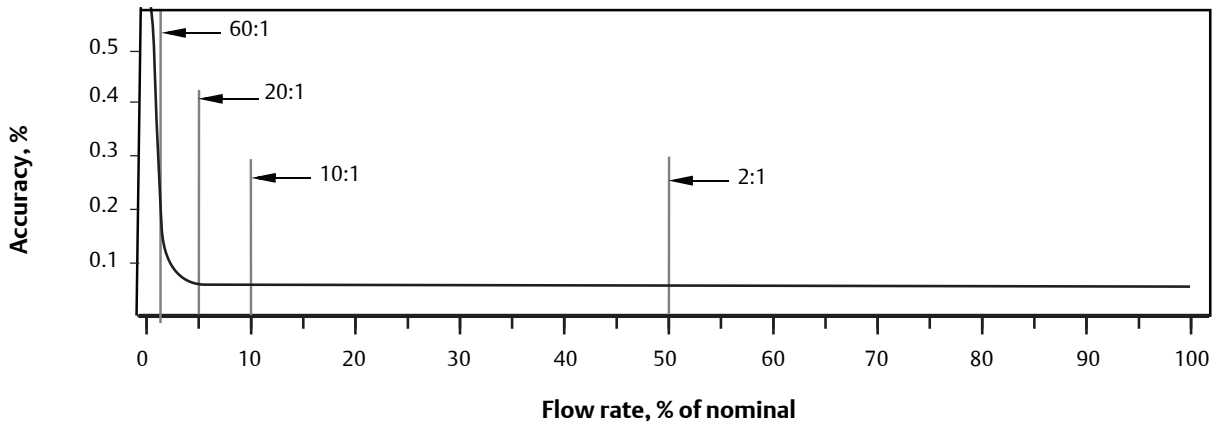
- Standard (SCFM) reference conditions are 14.7 psig and 60°F. Normal reference conditions are 1.013 barg and 0°C.

Zero stability

Zero stability is used when the flow rate approaches the low end of the flow range where the meter accuracy begins to deviate from the stated accuracy rating, as depicted in the turndown section below. When operating at flow rates where meter accuracy begins to deviate from the stated accuracy rating, accuracy is governed by the formula: accuracy = (zero stability/flow rate) x 100%. Repeatability is similarly affected by low flow conditions.

Turndown capabilities

The graph and table below represent an example of the measurement characteristics under various flow conditions. At flow rates requiring large turndowns (greater than 20:1), the zero stability values may begin to govern capability dependent upon flow conditions and meter in use.



Turndown from nominal flow rate		60:1	20:1	10:1	2:1	1:1
Accuracy	±%	0.25	0.05	0.05	0.05	0.05
Pressure drop	psig (barg)	0.008 (0.0006)	0.06 (0.004)	0.22 (0.015)	4.11 (0.28)	14.5 (1.0)

Process pressure ratings

Sensor maximum working pressure reflects the highest possible pressure rating for a given sensor. Process connection type and environmental and process fluid temperatures may reduce the maximum rating. Refer to the Technical Data Sheet for common sensor and fitting combinations.

All sensors comply with ASME B31.3 process piping code and Council Directive 97/23/EC of 29 May 1997 on pressure equipment. Some sensor models also comply with the ASME B31.1 power piping design code as indicated with a pressure rating in the table. Sensors with JIS process connections do not comply with ASME B31.1 power piping code.

(1) Values do not apply for high-temperature models (base model codes A or B).

Operating conditions: Environmental

Vibration limits

Meets IEC 68.2.6, endurance sweep, 5 to 2000 Hz, 50 sweep cycles at 1.0 g.

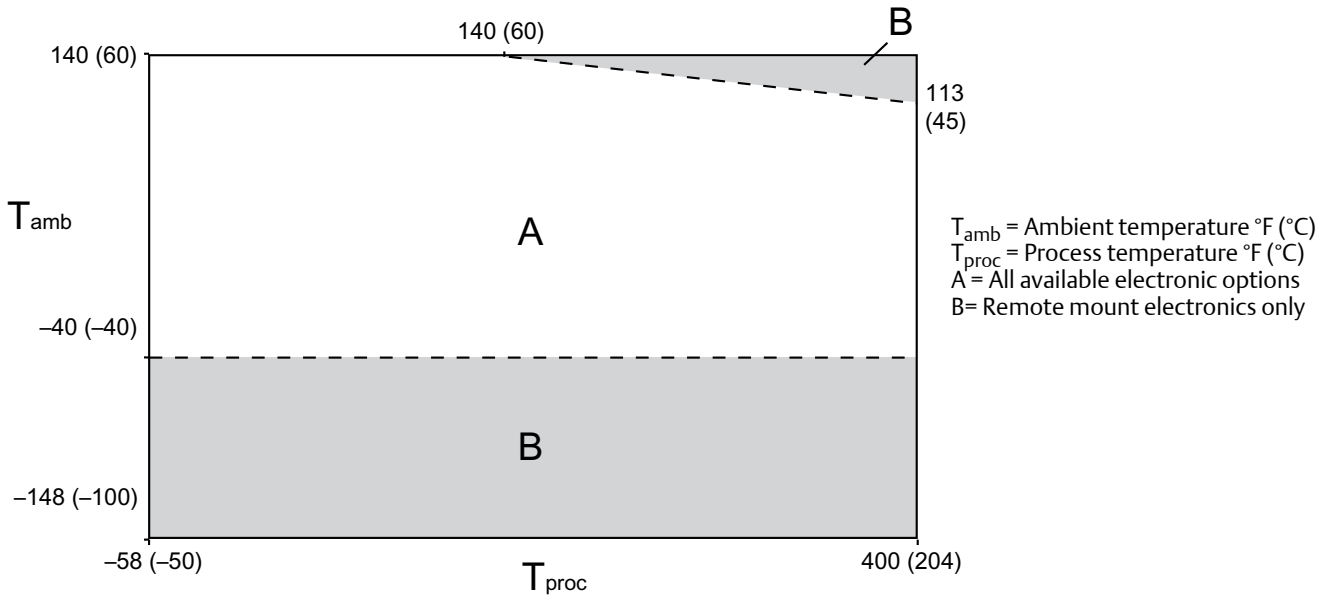
Temperature limits

Sensors can be used in the process and ambient temperature ranges shown in the temperature limit graphs. For the purposes of selecting electronics options, temperature limit graphs should be used only as a general guide. If your process conditions are close to the gray area, consult with your Micro Motion representative.

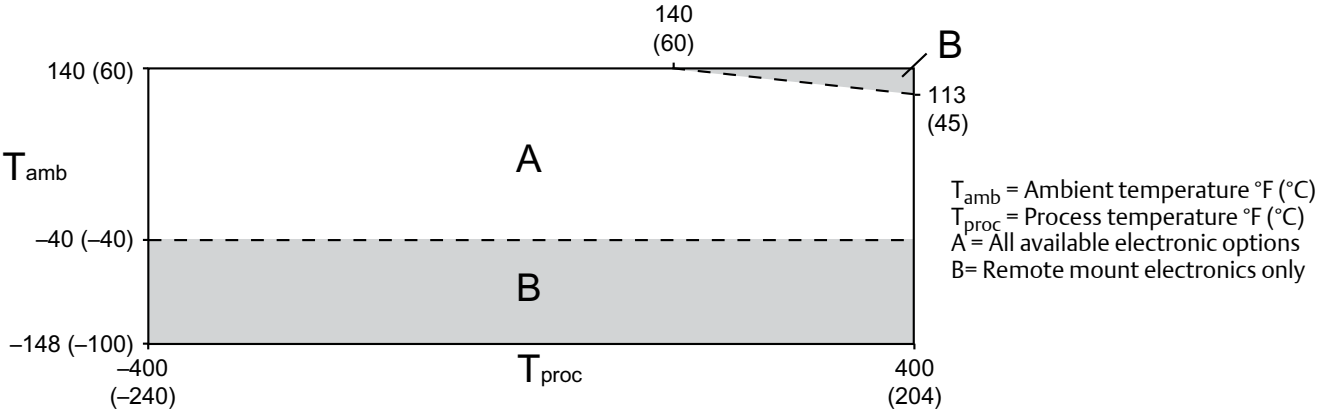
Notes

- In all cases, the electronics cannot be operated where the ambient temperature is below –40 °F (–40 °C) or above +140 °F (+60 °C). If a sensor is to be used where the ambient temperature is outside of the range permissible for the electronics, the electronics must be remotely located where the ambient temperature is within the permissible range, as indicated by the shaded areas of the temperature limit graphs.
- Temperature limits may be further restricted by hazardous area approvals. Refer to the hazardous area approvals documentation shipped with the sensor or available from the Micro Motion web site (*www.micromotion.com*).
- The extended-mount electronics option allows the sensor case to be insulated without covering the transmitter, core processor, or junction box, but does not affect temperature ratings. When insulating the sensor case at elevated process temperatures (above 140 °F), please ensure electronics are not enclosed in insulation as this may lead to electronics failure.

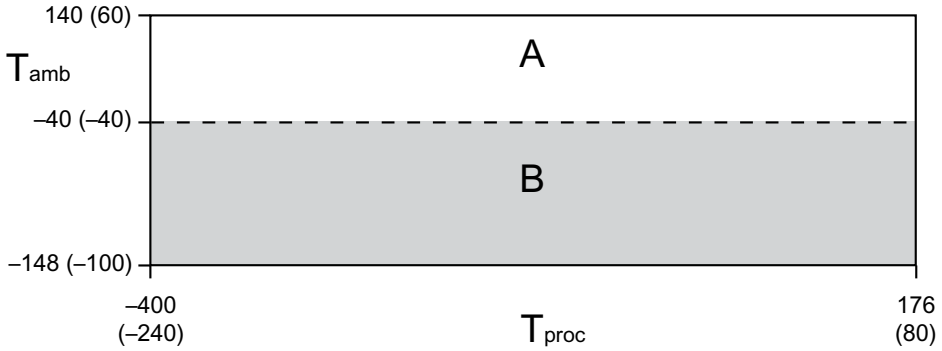
Ambient and process temperature limits for ELITE CMFS025–CMFS150 meters



Ambient and process temperature limits for ELITE CMF***M/L/H/P (excludes special order cryogenic modifications) and CMFS007-015 meters

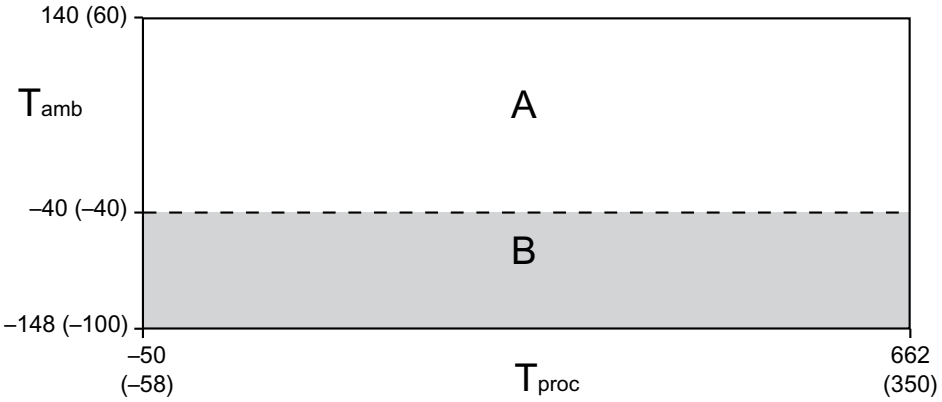


Ambient and process temperature limits for special order cryogenic ELITE meters



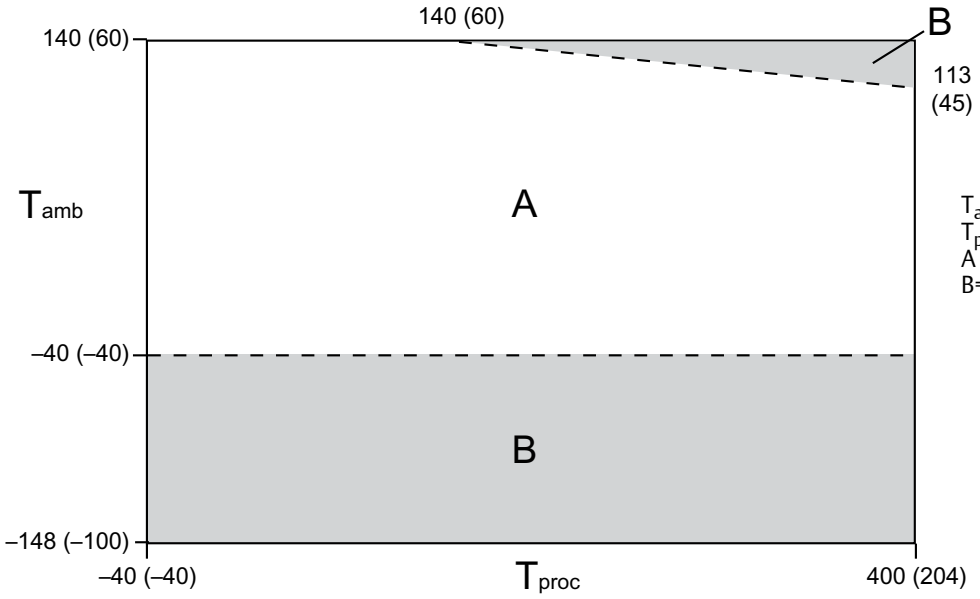
T_{amb} = Ambient temperature °F (°C)
T_{proc} = Process temperature °F (°C)
A = All available electronic options
B= Remote mount electronics only

Ambient and process temperature limits for high temperature ELITE meters



T_{amb} = Ambient temperature °F (°C)
T_{proc} = Process temperature °F (°C)
A = All available electronic options
B= Remote mount electronics only

Ambient and process temperature limits for Super Duplex ELITE meters



T_{amb} = Ambient temperature °F (°C)
T_{proc} = Process temperature °F (°C)
A = All available electronic options
B= Remote mount electronics only

Note
For Super Duplex models operating above 177 °C, please consult the factory before purchase.

Operating conditions: Process

Process temperature effect

- For mass flow measurement, process temperature effect is defined as the change in sensor flow accuracy due to process temperature change away from the calibration temperature. Temperature effect can be corrected by zeroing at the process conditions.
- For density measurement, process temperature effect is defined as the change in sensor density accuracy due to process temperature change away from the calibration density. See installation manual for proper setup and configuration.

Process temperature effect for all models

Model	% of maximum flow rate per °C	Density accuracy per °C	
		g/cm³	kg/m³

Process pressure effect

Process pressure effect is defined as the change in sensor flow and density accuracy due to process pressure change away from the calibration pressure. This effect can be corrected by dynamic pressure input or a fixed meter factor. See installation manual for proper setup and configuration.

Process pressure effect for CMFS models

Marine approval classifications

For models CMF200M, CMF300M, CMF350M, CMF400M, CMFHC2M, CMFHC3M, CMFHC4M.

Marine approval	Country
Lloyd's Register ENV1, ENV2, ENV3, ENV5	United Kingdom
Det Norske Veritas- Germanischer Lloyd	Norway-Germany
Bureau Veritas	France
American Bureau of Shipping	USA
Nippon Kaiji Kyokai	Japan

Industry standards

Type	Standard
Weights and Measures for custody transfer applications:	■ MID OIML R117/R137 ■ National Type Evaluation Program (NTEP) ■ Measurement Canada ■ INMETRO Brazil
Hygienic approvals (some models)	■ ASME BPE ■ EHEDG, 3A
Industry standards and commercial approvals	■ NAMUR: NE132 (burst pressure, sensor flange to flange length), NE131 ■ Pressure Equipment Directive (PED) ■ Canadian Registration Number (CRN) ■ Dual Seal ■ ASME B31.1 power piping code and ASME B31.3 process piping code ■ SIL2 and SIL3 safety certifications ■ All Super Duplex materials comply with NORSOK M-650

Notes

- Approvals shown are for ELITE meters configured with a core processor for remote 4-wire connection to a Micro Motion transmitter. Meters with integral electronics may have more restrictive approvals. Refer to the Product Data Sheet for each transmitter for details.
- When a meter is ordered with hazardous area approvals, detailed information is shipped along with the product.
- More information about hazardous approvals, including detailed specifications and temperature graphs for all meter configurations is available on the ELITE Series product page at the Micro Motion web site (*www.micromotion.com*).

Transmitter interface

A Micro Motion flowmeter system is highly customizable to provide a configuration that is tailor-fit to specific applications.

Robust transmitter offerings allow a multitude of mounting options:

- Compact mounting integral to the sensor
- Field mount variants for harsh conditions
- Compact control room DIN rail packages for optimal locating in a control cabinet
- Specific fit-for-purpose solutions for two-wire connectivity or filling and dosing machinery integration

ELITE meters are available with an expansive selection of input and output connectivity options including the following:

- 4-20 mA
- HART™
- WirelessHART™
- EtherNet/IP
- FOUNDATION™ fieldbus
- PROFIBUS
- Modbus®
- Other protocols may be available on request

Physical specifications

Materials of construction

General corrosion guidelines do not account for cyclical stress, and therefore should not be relied upon when choosing a wetted material for your Micro Motion meter. Please refer to the *Micro Motion Corrosion Guide* for material compatibility information.

Wetted part materials

Note
For flange compatibility, please refer to the Online Store Sizing and Selection Tool at the Micro Motion web site (*www.micromotion.com/onlinestore*).

Dimensions

These dimensional drawings are intended to provide a basic guideline for sizing and planning. They are representative of a 316 stainless steel model fitted with ASME B16.5 CL 150 flange, and 2400 transmitter.

Face-to-Face (Dim. A, below) dimensions for all ELITE meters with each available process connection can be found in the ELITE Technical Data Sheet.

Complete and detailed dimensional drawings can be found through the product drawings link in our online store (*www.micromotion.com/onlinestore*).

Notes for all dimensions:

- Accuracy: ±1/8 inch (±3 mm)
- Representative of a 316 stainless steel model fitted with ASME B16.5 CL 150 flange, and 2400 transmitter

Case and hygienic options

Code	Description	Availability									
N	Standard case; 300-series stainless steel										
D	Standard case; 300-series stainless steel; with 1 inch rupture disc										
P	Standard case; 300-series stainless steel; with one drain or two purge fittings[1]										
J	Standard case; 300-series stainless steel; with mounting bracket										
U	Standard case; 300-series stainless steel; with one 1/2 inch drain fitting; with mounting bracket										
M	316L stainless steel case										
Q	316L stainless steel case; with mounting bracket										
K	316L stainless steel case; with one drain or two purge fittings[1]										
H	316L stainless steel case; hygienic finish: 32 Ra (0.8 µm) Flow Path[2]										
T	316L stainless steel case; hygienic finish: 32 Ra (0.8 µm) Flow Path; with mounting bracket[2]	T	H	K	Q	M	U	J	P	D	N

CMF350A						M				D	N
All models not listed above									P		N

(1) CMFS models have one 1/2-inch female NPT drain fitting; CMF350 and CMF400 models have two 1-inch NPT female purge fittings; all other models have two 1/2-inch NPT female purge fittings.

(2) Only available with process connection code 321, 344, 345, or 346.

Electronics interface

Code	Description	Availability
0	Model 2400S transmitter	
1	Extended mount Model 2400S transmitter	
2	4-wire polyurethane-painted aluminum integral enhanced core processor for remote mount transmitters	
3[1]	4-wire stainless steel integral enhanced core processor for remote mount transmitters;	
4	4-wire polyurethane-painted aluminum integral extended mount enhanced core processor for remote mount transmitters	
5[1]	4-wire extended mount stainless steel integral enhanced core processor for remote mount transmitters	
6[2]	MVDSolo; polyurethane-painted aluminum integral enhanced core processor (for OEMs); when ordered with approval C, A, Z, I, MVD Direct Connect™ I.S. barrier is supplied; not available with approval code U	
7[1][2]	MVDSolo; stainless steel integral enhanced core processor (for OEMs); when ordered with approval C, A, Z, I, MVD Direct Connect™ I.S. barrier is supplied; not available with approval code U	
8[2]	MVDSolo; extended mount polyurethane-painted aluminum integral enhanced core processor (for OEMs); when ordered with approval C, A, Z, I, MVD Direct Connect™ I.S. barrier is supplied	
9[1][2]	MVDSolo; extended mount stainless steel enhanced core processor (for OEMs); when ordered with approval C, A, Z, I, MVD Direct Connect™ I.S. barrier is supplied	
A	4-wire stainless steel integral core processor for remote mount transmitters	
C	Model 1700/2700 transmitter	
H[3]	9-wire extended mount polyurethane-painted aluminum junction box	
J[4]	2-wire integrally mounted Model 2200S transmitter; only available with calibration option C or K	
M	For integral mount standard finish FMT Filling transmitter (must order with FMT); must be ordered with FMT Filling transmitter, not sold separately	
N	For integral mount improved surface finish (64Ra) FMT Filling transmitter (must order with FMT); must be ordered with FMT Filling transmitter, not sold separately	
Q	4-wire polyurethane-painted aluminum integral core processor for remote mount transmitters	
R	9-wire polyurethane-painted aluminum junction box	
S	9-wire 316L stainless steel junction box	
T[3]	9-wire extended mount stainless steel junction box	
W[2]	MVDSolo; polyurethane-painted aluminum integral core processor for direct host connection (for OEMs)	
D[2]	MVDSolo; stainless steel integral core processor for direct host connection (for OEMs)	
U[4]	2-wire extended Model 2200S transmitter; only available with calibration option C or K	
F	For integral mount 5700 transmitter

(3) Not available with approval T, S, L, 5 or J.
(4) Only available with approval M, T, S, 5 and L.

Approvals

Code	Description	Availability
2	CSA (US and Canada): Class I, Division 2, Groups A,B,C,D	
3	IECEx Zone 2	
5	TIIS – T5 (IIC) Temperature Classification; not available for quotes outside of Japan; only available with electronic interface code R or S	
6[1]	ATEX - Equipment Category 2 (Zone 1, IIC modified) / PED compliant; models CMF200, CMF300, and CMF400 only	
7[1]	IECEx Zone 1, IIC modified; models CMF200, CMF300, and CMF400 only	
8[1]	NEPSI, IIC modified; only available with language option M (Chinese)	
A	CSA (US and Canada): Class I, Division 1, Groups C and D	
C	CSA (Canada only)	
G	Country Specific Approval – Requires a selection from the Approvals section of the 'Certificate, Tests, Calibrations and Services' model code option	
I	IECEx Zone 1	
J	Hardware ready for TIIS approval; requires conduit connection code E when used with electronics interface code 2, 3, 4, 5, Q, or A	
M	Micro Motion Standard; no approval; no barrier included (if applicable)	
N	Micro Motion Standard / PED compliant; no approval; no barrier included (if applicable)	
P	NEPSI; only available with language option M (Chinese)	
L	TIIS – T2 Temperature Classification; not available for quotes outside of Japan	
S	TIIS – T3 Temperature Classification; not available for quote outside of Japan	
T	TIIS - T4 Temperature Classification; not available for quote outside of Japan	
U	UL	
V	ATEX - Equipment Category 3 (Zone 2) / PED compliant	
Z	ATEX - Equipment Category 2 (Zone 1) / PED compliant

Approvals *(Continued)*

Code	Description	Availability
2	CSA (US and Canada): Class I, Division 2, Groups A,B,C,D	
3	IECEx Zone 2	
5	TIIS – T5 (IIC) Temperature Classification; not available for quotes outside of Japan; only available with electronic interface code R or S	
6[1]	ATEX - Equipment Category 2 (Zone 1, IIC modified) / PED compliant; models CMF200, CMF300, and CMF400 only	
7[1]	IECEx Zone 1, IIC modified; models CMF200, CMF300, and CMF400 only	
8[1]	NEPSI, IIC modified; only available with language option M (Chinese)	
A	CSA (US and Canada): Class I, Division 1, Groups C and D	
C	CSA (Canada only)	
G	Country Specific Approval – Requires a selection from the Approvals section of the 'Certificate, Tests, Calibrations and Services' model code option	
I	IECEx Zone 1	
J	Hardware ready for TIIS approval; requires conduit connection code E when used with electronics interface code 2, 3, 4, 5, Q, or A	
M	Micro Motion Standard; no approval; no barrier included (if applicable)	
N	Micro Motion Standard / PED compliant; no approval; no barrier included (if applicable)	
P	NEPSI; only available with language option M (Chinese)	
L	TIIS – T2 Temperature Classification; not available for quotes outside of Japan	
S	TIIS – T3 Temperature Classification; not available for quote outside of Japan	
T	TIIS - T4 Temperature Classification; not available for quote outside of Japan	
U	UL	
V	ATEX - Equipment Category 3 (Zone 2) / PED compliant	
Z	ATEX - Equipment Category 2 (Zone 1) / PED compliant	

Models	With electronics interface code	Z	V	U	T	S	L	P	N	M	J	I	G	C	A	8	7	6	5	3	2
CMF200M/H/L, CMF300M/H/L, CMF350M, CMF400M/H/L, CMF350P[2], CMF400P[3]	2, 3, 4, 5	Z			T	S	L	P	N	M	J	I	G		A	8	7	6			
	J, U	Z	V						N	M		I	G		A					3	
	Q, A, R, S	Z	V	U	T	S	L	P	N	M	J	I	G	C	A	8	7	6	5	3	2
	H, T, W, D, 6, 7, 8, 9	Z	V	U				P	N	M		I	G	C	A	8	7	6		3	2
CMF200A/B, CMF300A/B, CMF350A, CMF400A/B	2, 3, Q, A, C, R, S	Z			T			P	N	M	J	I	G		A						
	W, D, 6, 7	Z						P	N	M		I	G		A						
CMFHC2Y, CMFHC3Y	2, 3, 4, 5, 6, 7, 8, 9	Z						P	N	M		I	G		A		7	6			
CMFHC2A/M, CMFHC3A/M, CMFHC4M	2, 3, 4, 5	Z			T			P	N	M	J	I	G		A	8	7	6			
	6, 7, 8, 9	Z						P	N	M	J		G		A	8	7	6			

(1) Models CMF200, CMF300, CMF400, CMFHC2, CMFHC3, and CMFHC4 are rated for Group IIB with standard ATEX approval code Z, IECEx approval code I, or NEPSI approval code P (where applicable). The IIC modification option (approval codes 6, 7, and 8) should be used only when necessary for the specific area classification.

(2) Model CMF350P is not available with approval code T, S, L, J, 5, or U.

(3) Model CMF400P is only available with approval code U if it is ordered with electronics interface code H or T. Model CMF400P is only available with approval code T, S, or L if it is ordered with electronics interface code Q, A, R, or S.

Languages

Code	Language option
A	Danish CE requirements document and English installation manual
D	Dutch CE requirements document and English installation manual
E	English installation manual
F	French installation manual
G	German installation manual
H	Finnish CE requirements document and English installation manual

	CMF025, CMF050, CMF100, CMF200H/L/M, CMF300H/L/M, CMF350M/P, CMF400H/M/P	Z			D		3	2

(1) Accuracy levels apply to liquid only.
(2) Consult Factory for ISO 17025 accredited calibration with 0.014% reference uncertainty.
(3) Requires electronics interface code 0, 1, 2, 3, 4, 5, 6, 7, 8, or 9.

Measurement application software

Code	Measurement application software option
A	Petroleum measurement; available only for CMFS models with electronics interface codes 6, 7, 8 and 9; for electronic interface codes 0, 1, 2, 3, 4, or 5, select the petroleum measurement software option on the transmitter
C	Cryogenic application; includes remote core processor for direct host connection; available only for CMF025M, CMF050M, and CMF100M models with electronics interface option R, conduit option A, and approval options M, P, or Z; not available with wafer process connections.
Z	No measurement application software

Factory options

Code	Factory option
Z	Standard product
X	ETO product

Certificates, tests, calibrations, and services

These option codes can be added to the end of the model code if needed, but no code is required when none of these options is selected.

Note
There may be additional options or limitations depending on total meter configuration. Contact a sales representative before making your final selections.

Material quality examination tests and certificates

Select any.

Code	Factory option
SD	Super Duplex certification package (hydrostatic test certificate 3.1; material inspection certificate 3.1; ferrite test certificate 3.1; NACE certificate 2.1 MR0175); only available on CMFHC2Y–CMFHC3Y
MC	Material inspection certificate 3.1 (supplier lot traceability per EN 10204); not available separately on CMFHC2Y–CMFHC3Y
NC	NACE certificate 2.1 (MR0175 and MR0103); not available separately on CMFHC2Y–CMFHC3Y
KH	KHK package 3.1 (cert package to accommodate approval in Japan); only available on CMF025–CMF350 and CMF400B, but not available on CMF200B–CMF300B

Radiographic testing

Select only one from this group.

Code	Factory option
RE	X-ray package 3.1 (radiographic examination certificate; weld map; radiographic inspection NDE qualification)
RT	X-Ray package 3.1 (radiographic examination certificate with digital image; weld map; radiographic inspection NDE qualification)

Pressure testing

Select any from this group.

Code	Factory option
HT	Hydrostatic test certificate 3.1 (wetted components only); not available separately on CMFHC2Y–CMFHC3Y
PN	Pneumatic test certificate 3.1; only available on CMF025–CMF400 with base model codes H, P, L, or M
HE	Helium leak test certificate 3.1 (wetted components only)
SL	Sensitive leak test certificate 3.1 (case component only); only available on CMFS007 and CMFS025–CMFS150

Dye penetrant examination

Select any from this group.

Code	Factory option
D1	Dye penetrant test package 3.1 (process connection only; liquid dye penetration NDE qualification)
D2	Dye penetrant test package 3.1 (case only; liquid dye penetration NDE qualification)

Weld examination

Code	Factory option
WP	Weld procedure package (weld map, weld procedure specification, weld procedure qualification record, welder performance qualification)

Positive material testing

Select only one from this group.

Code	Factory option
PM	Positive material test certificate 3.1 (without carbon content)
PC	Positive material test certificate 3.1 (including carbon content); only available on sensors with base model code M, L, or A

Special cleaning

Code	Factory option
O2	Declaration of compliance oxygen service 2.1; not available on CMFHC2–CMFHC4

GOST compliance

Code	Factory option
GR	Russian GOST calibration verification certificate

Accredited Calibration

Select only one from this group.

Code	Factory option
IC	ISO17025 accredited calibration and certificates (9 points total)
BB	MID Calibration for Marine Bunkering; no printer; only available on CMFHC3M with electronics interface code 2–5 and calibration code Z; not available with any other add-on options for special test or calibration

Special calibration options

Select either none, CV, or CV with one of the additional verification point options.

Code	Factory option
CV	Custom verification (alter original verification points)
01	Add 1 additional verification point
02	Add 2 additional verification point
03	Add 3 additional verification point
06	Add up to 6 additional verification points
08	Add up to 8 additional verification points
16	Add up to 16 additional verification points

Weights and measures

Code	Factory option
WM	Tag for US NTEP certified applications; not available on any CMFS, CMF010, or CMFHC2–CMFHC4 models

ASME B31.1 Power Piping design code certification

Code	Factory option
GC	B31.1 Power Piping design code certification

Sensor completion

Select any from this group.

Code	Factory option
WG	Witness general
SP	Special packaging

Instrument tagging

Code	Factory option
TG	Instrument tagging – customer information required; maximum 24 characters; only available on CMFS models, but not available on any CMFS010–CMFS015 models

Additional hardware

Code	Factory option
PK	2-inch Pipe Mount U-Bolt Kit for electronics; only available on CMF025M, CMF050M, and CMF100M (with measurement application code C) and on CMF200A/B–CMF400A/B and CMFHC2A–CMFHC3A (with any measurement application code)

Country specific approvals

Select one from the following if approval code G is selected.

Code	Factory option
R1	EAC Zone 1 – Hazardous Area Approval(1)(2)
R2	EAC Zone 1 - IIC modified - Hazardous Area Approval(1)(2)
R3	EAC Zone 2 – Hazardous Area Approval(1)(3)
B1	INMETRO Zone 1 - Hazardous Area Approval(1)(2)
B2	INMETRO Zone 1 - IIC modified - Hazardous Area Approval(1)(2)
B3	INMETRO Zone 2 – Hazardous Area Approval(1)

(1) Only available with approval code G.
(2) Not available with electronics interface code 0 or 1.
(3) Only available with electronics interface code 0, 1, J, or U.
